

## **Alamur Engineering Institute successfully conducts training courses in Malaysia**

Alamur Engineering Institute, in its commitment to deliver high quality programmes, successfully conducted training courses in Malaysia tackling two major disciplines in the construction industry.

The training programmes were attended by industry professionals in the construction and engineering field from different private and government organizations.

The programmes conducted were:

### **Course 01: Five Dimensions in Construction Project Management**

### **Course 02: Project Financial Management**

The knowledge gathered by the attendees from the programmes can be used to enhance their performance and will allow them to become effective partners of their organizations in delivering quality service to their clients.
